

Moein Ghezelbash

Senior Technical Product Manager

B2B Platforms • AI-Augmented Product Development • Product & Technology Strategy

Tehran, Iran | +98 912 013 7435 | moeinghezelbash@gmail.com | linkedin.com/in/moeinghezelbash

PROFESSIONAL SUMMARY

Senior Technical Product Manager with 10+ years of experience building and evolving digital products, B2B platforms, and business systems. I translate customer and business problems into clear requirements, roadmaps, MVPs, and practical solutions, while my technical background enables close collaboration with engineering teams on product and technology decisions. I am currently focused on building independent software products and applying Generative AI and AI Coding Agents across product discovery, prototyping, implementation review, testing, debugging, and documentation.

CORE COMPETENCIES

Product Leadership: Product strategy and discovery, problem and requirements definition, roadmapping and prioritization, MVPs, iterative development, product lifecycle management, and cross-functional delivery coordination

B2B Products & Platforms: Product workflow design, API and partner integrations, pricing and inventory, business systems, CRM, customer operations, and travel technology

AI-Augmented Product Development: Generative AI, AI Coding Agents, Prompt Engineering, AI-Assisted Product Discovery, rapid prototyping, code and implementation review, testing, debugging, and documentation

Analytics, Business & Leadership: Product Analytics, Business Intelligence, data-driven decision making, stakeholder management, business development, supplier and partner management, budgeting, cross-functional collaboration, and executive reporting

Companies:

Alibaba Travels • Rexan International Hotels Group • Besouye Samyar Safar • Tahlilgaran Fanavaran Faraz Raya • Kavir Motor • 3Click

Products & Platforms:

GardeshOnline • Channelead • Safarkook • RAYAPMS • HotelB2C • ViraTower • A-Forwarder • Farvah Cafe • TIME

SELECTED PRODUCT WORK

Technical Product Manager — A-Forwarder | iMoein.com

Aug 2026 – Present

- Defined and led a cross-platform product for transferring messages and call activity from SIM-enabled Android devices to iPhone.
- Structured the product as four independent apps: SMS and Phone apps on Android and SMS and Phone apps on iPhone, with each module able to operate independently.
- Defined core product flows for SMS synchronization and sending, call-event forwarding, multi-SIM handling, device connectivity, offline states, gateway status, background behavior, and cross-device notifications.
- Created separate Android and iOS roadmaps from feasibility and MVP validation through broader product development, accounting for the constraints of each platform.
- Applied generative AI and AI Coding Agents across technical research, product specification, prototyping, implementation review, testing, debugging, and release planning.

ACHIEVEMENTS

- Turned a real-world connectivity limitation into a modular four-app product.
- Separated SMS and Phone into independent apps, enabling separate development, testing, and release cycles.
- Defined a consistent Android-to-iPhone experience across connectivity, messaging, calls, multi-SIM behavior, offline states, and system status.
- Balanced the target product experience with Android and iOS constraints through phased product and technology decisions.

Product Manager | Farvah Cafe

May 2026 – Present

- Leading Farvah Cafe as an integrated café-management and customer-engagement product from MVP toward a multi-module commercial platform.
- Designed and executed a phased roadmap spanning POS, order management, menu and product workflows, customer profiles, loyalty and rewards, CRM, accounting workflows, role management, and multi-branch operations.
- Defined workflows and requirements for administrators, branch managers, cashiers, baristas, and customers based on real operational processes.
- Led the product through Phase 7; Phase 8 is defined around franchise capabilities, multi-branch expansion, and preparation for commercial scalability.
- Used generative AI and AI Coding Agents across research, requirements, prototyping, implementation review, testing, debugging, and documentation.
- Kept product decisions aligned with technical architecture, user experience, and operational needs as the product evolved from MVP toward a commercial release.

ACHIEVEMENTS

- Turned an initial concept into a phased product with a clear path from MVP to commercial readiness.
- Integrated sales, daily operations, customer engagement, loyalty, CRM, and back-office workflows into a single platform.
- Designed the product from the outset for multi-branch operations, centralized management, and future franchise expansion.
- Applied AI-augmented workflows to make research, requirements definition, prototyping, and product iteration faster and more structured.

Product Manager — TIME | iMoein.com

May 2026 – Jun 2026

- Led the development of TIME.imoein.com as a standalone web product for viewing and comparing time, date, and time zones across cities.
- Defined the product experience around live clocks, city and time-zone search, saved cities, Persian and Gregorian calendars, week numbers, and responsive mobile and desktop UX.
- Designed the product for public use with configurable data, lightweight administration, and a continuous publishing and update workflow through GitHub Pages.
- Managed the product from concept and initial scope through implementation, testing, refinement, and public release.

ACHIEVEMENTS

- Turned the concept into a complete, publicly usable product within a short development cycle.
- Delivered a standalone web product with user-facing features, data management, and a real release process rather than a prototype.
- Created an extensible foundation for adding more services around time, calendars, and location-related information.

PROFESSIONAL EXPERIENCE

Director of Infrastructure & Technology Operations | Besouye Samyar Safar

Apr 2024 – May 2026

- Partnered with engineering and business teams to develop, scale, and strengthen the reliability of B2B travel products.
- Translated operational and commercial needs into platform, data, reporting, automation, and service-reliability initiatives.
- Supported the development and launch of new products and services by coordinating technical requirements and operational readiness.
- Expanded analytics and business intelligence capabilities to improve visibility into operational and commercial performance.
- Implemented platform improvements and automation to reduce manual work and improve service reliability.

ACHIEVEMENTS

- Improved scalability and operational readiness across business-critical B2B platforms.
- Expanded management decision-support capabilities through BI and structured reporting.
- Reduced operational dependence on manual processes through automation.

Technical Operations & Infrastructure Consultant | Tahlilgaran Fanavaran Faraz Raya

Apr 2024 – Oct 2025

- Advised on technical platform design and operational readiness for hospitality and enterprise software environments.
- Worked with development teams to improve deployment, release, monitoring, and support workflows.
- Translated customer and operational needs into infrastructure, automation, and service-delivery improvements.
- Provided technical assessments, risk visibility, and delivery reporting to senior managers and stakeholders.

ACHIEVEMENTS

- Improved software deployment and maintenance workflows in customer environments.
- Improved operational visibility through monitoring and structured reporting.
- Supported reliable delivery of business-critical hospitality software.

Business Development Manager – B2B Product & Platform Growth | Besouye Samyar Safar

Dec 2020 – Mar 2024

- Led product and business development for a B2B hotel-booking platform connecting supplier capabilities, partner APIs, inventory, pricing, and operational workflows.
- Translated partner, customer, and business requirements into product improvements and integration priorities.
- Managed suppliers and API partners while coordinating delivery across commercial and technical teams.
- Designed data-driven approaches to pricing, inventory management, and data aggregation to improve booking quality and commercial performance.
- Owned budgeting, executive reporting, and stakeholder communication for business-growth initiatives.

ACHIEVEMENTS

- Expanded the supplier and API partner network through successful integrations.
- Reduced booking conflicts by improving inventory aggregation processes and models.
- Created structured reporting frameworks for commercial and management decision making.

Product Manager | Alibaba Travels

Apr 2016 – Oct 2018

- Managed digital products and technology programs across payments, CRM, customer operations, and operational workflows in an online travel business.
- Led CRM implementation and optimization, translating service and operational needs into workflows and system improvements.
- Worked cross-functionally with engineering, operations, customer support, and infrastructure teams to improve product reliability and service quality.

- Contributed to business intelligence initiatives and management dashboards for operational decision making.
- Managed technology programs across payment systems, customer operations, business continuity, and call-center and office expansion.

ACHIEVEMENTS

- Improved customer-service workflows and operational efficiency through CRM optimization.
- Supported the reliability of payment and operational systems in a high-transaction travel business.
- Improved management visibility through BI and operational reporting.

Technology Consultant | 3Click

Sep 2020 – Dec 2020

- Reviewed digital travel product workflows, infrastructure, security, and payments from a product and technology perspective.
- Identified opportunities to improve reliability and workflows across customer-facing and operational systems.
- Provided recommendations that connected business needs with practical technology improvements.

Finance Systems Consultant | Kavir Motor

Jul 2020 – Oct 2020

- Contributed to finance-system and payment-integration projects from product, operations, and technology perspectives.
- Mapped financial workflows and identified process and system improvement opportunities.
- Recommended improvements to the reliability and usability of financial operations.

Project Manager – Digital Broadcasting Platform | LiveFM Broadcasting

Jun 2012 – Mar 2016

- Led development and operations for a cloud-based live audio and digital broadcasting platform.
- Coordinated product, technology, and operational requirements for high-traffic live broadcasting events.
- Managed delivery across technical and operational teams with a focus on reliability, scale, and event deadlines.

ACHIEVEMENTS

- Delivered large-scale online broadcasting projects for high-traffic events.
- Maintained service continuity during peak-demand periods.

PRODUCT, ANALYTICS & TECHNOLOGY

Product Discovery • Product Strategy • Roadmapping • Requirements Management • MVP & Iterative Delivery • Product Analytics • Business Intelligence • Generative AI • AI Coding Agents • Prompt Engineering • API & Partner Integrations • CRM • Business Systems • B2B Platforms • Travel Technology • Git / GitHub / GitLab

EDUCATION & PROFESSIONAL DEVELOPMENT

- **Software Engineering – Islamic Azad University**
- ITIL – IT service management principles focused on service quality, operational processes, change management, and continuous improvement.
- SAFe Scrum – Agile and Scrum practices for product delivery in scaled organizations, emphasizing iterative development, prioritization, cross-functional collaboration, and coordinated delivery.
