Moein Ghezelbash

Technical Product Manager

B2B Platforms • Product & Technology Strategy • AI-Augmented Delivery

Tehran, Iran | +98 912 013 7435 | moeinghezelbash@gmail.com

PROFESSIONAL SUMMARY

Technical Product Manager with 10+ years across B2B platforms, travel technology and 0-to-1 products. Led Gardesh in digital media and FARVAH in cafe operations, from MVP and roadmapping to feature delivery. At Samyar Safar, drove travel-service bundling, operational resilience and data-driven reporting, reducing report preparation from sometimes two working days to one hour or less.

PROFESSIONAL EXPERIENCE

Founder & Product Lead | Gardesh | Aug 2026–Present

• Repositioned Gardesh from group watching to a multimedia platform; prioritized its MVP and phased roadmap by user needs, value, cost and risk.
• Led self-service episode creation and publishing for content creators; permissions and reuse of the Media Library and audio pipeline eliminated platform-admin dependency and duplicate upload work.
• Enabled Hosted, YouTube and Aparat video sources with manual selection and automatic playback-error failover; placed region-aware source selection on the future roadmap.
• Unified live-stream lifecycle and access controls; turned reconnection and synchronization into acceptance criteria. Added Safari/iOS issues to QA, with 81 Native Live automated tests passing.
• Defined a 13-issue Creator-First publisher roadmap, prioritizing first publication and resuming drafts; the redesign remains under development and review.

Business Development & Technical Operations Manager | Samyar Safar | Dec 2020–May 2026

• Led requirements and rollout for a B2B2C travel bundle covering flights, hotels, transfers and airport services, enabling multi-service booking and cross-selling within one purchasing journey.
• Identified and prioritized critical product dependencies during internet disruptions; introduced internal alternatives for communication, alerts, build workflows and certificate management to reduce reliance on external services.
• Coordinated product needs across engineering, sales and operations, and managed relationships with online and offline advertising publishers to support marketing activities.
• Co-led five years of budgeting, combining financial and operational reporting to help leadership review performance and budget variance.
• Redesigned sales reporting through integrated data pipelines and management dashboards, reducing preparation time from sometimes two working days to **no more than one hour**.

Product Manager | Alibaba Travels (Iran) | Apr 2016–Oct 2018

• CRM product delivery: Built on frontline customer-support experience to shape ParsLogic CRM rollout and enhancements, aligning engineering and support around structured customer-interaction and case-tracking workflows.
• Contact-center operations: Translated queue management, call routing and agent performance needs into actionable CRM requirements and operational reporting, strengthening service visibility.
• Financial reconciliation: Identified cross-team transaction-matching bottlenecks and led delivery of a reconciliation tool, turning a process that sometimes took a week into a trackable **one-day SLA**.
• Business intelligence: Worked with the BI group to translate finance and operations data needs into management reporting and dashboards, addressing reliance on overnight processing for reporting.
• Service continuity: Coordinated with engineering and operations on contact-center relocation, new office rollouts and redundant-site initiatives, prioritizing minimal disruption to customer services.

Career Break | Nov 2018–Jun 2020: Self-directed learning and helping organize WordPress Iran meetups.

SELECTED INDEPENDENT PROJECTS

• TIME | May–Jun 2026: World-clock web app with saved cities and Persian/Gregorian calendars — time.imoein.com.
• FARVAH / Smart Coffee | Jun 2026: Cafe operations platform spanning POS, CRM, inventory and branches — farvahcafe.com.
• Device Sync | Aug 2026: Local-network synchronization of SMS and call events between Android and iOS.
• AI Detector | Oct 2026: Browser-based EXIF/C2PA inspection and image metadata removal — ai-detector.imoein.com.
• QR Code Studio | Oct 2026: QR design in 11 languages with SVG/PNG export — qrcode.imoein.com.

ADDITIONAL EXPERIENCE

Technology Operations Consultant | Faraz Raya (2024–2026) • Technology Consultant | 3Click (2020) • Financial Systems Consultant | Kavir Motor (2020).

Project Manager | LiveFM Internet Radio (2012–2016): Developed online radio stations and internet live streaming.

WordPress Persian Translation Contributor | 2013–Present: Contributed Persian translations to the WordPress project.
