

MOEIN GHEZELBASH

Technical Operations Manager (Infrastructure • Business Systems • Process Automation)

Tehran, Iran | moeinghezelbash@gmail.com | [LinkedIn](#) | +989120137435

Professional Summary

Technical Operations Manager with 10+ years of experience leading technology operations, infrastructure modernization, business systems implementation, and digital platform development across travel, hospitality, e-commerce, and technology sectors. Experienced in bridging the gap between technology, business, and operations by leading infrastructure projects, business-critical platforms, process automation initiatives, and cross-functional teams. Proven track record in building scalable systems, improving operational efficiency, managing stakeholders, and supporting business growth through technology-driven solutions. Strong background in infrastructure management, business intelligence, product delivery, vendor integrations, and operational process optimization.

Core Competencies

Technology Operations

- IT Infrastructure Management
- Linux Server Administration
- Virtualization Platforms
- Network Design & Planning
- Service Monitoring
- Business Continuity & Reliability

Process Automation

- CI/CD Workflows
- Deployment Automation
- Bash Scripting
- Workflow Optimization
- Operational Efficiency Improvement

Data & Business Intelligence

- ETL Pipelines
- Business Intelligence
- Apache Superset
- Data Aggregation
- MySQL
- MariaDB

Business Systems

- CRM Implementation
- API Integrations
- Business Process Design
- Vendor & Supplier Management
- B2B Platform Operations

Leadership & Management

- Project Management
- Stakeholder Management
- Budget Planning
- Cross-Functional Team Leadership
- Strategic Planning

Work Experience

Director of Infrastructure & Technology Operations | Be Souye Samyar Safar | April 2024 – May 2026

- Led infrastructure strategy and operations supporting high-volume B2B travel technology platforms.
- Managed system architecture, database operations, monitoring, and operational reliability initiatives.
- Worked closely with software engineering teams during the development and launch of new products and services.
- Built ETL pipelines and business intelligence capabilities to support operational and commercial decision-making.
- Introduced automation processes that reduced manual operational workloads.

Key Achievements

- Implemented scalable infrastructure supporting large-scale B2B transactions.
 - Improved reporting and analytics capabilities through BI platform integration.
 - Enhanced database performance and system reliability.
-

Infrastructure & DevOps Consultant | Tahlilgaran Fanavaran FarazRaya | April 2024 – October 2023

- Designed and implemented virtualization and infrastructure environments supporting hospitality and enterprise software deployments.
- Managed business-critical services including mail systems, customer environments, and cloud-based service platforms.
- Developed deployment automation solutions that improved software installation and update processes across customer infrastructures.
- Established operational monitoring practices and supported development teams in improving release management processes.
- Collaborated with executive stakeholders and investors to ensure operational stability and technology alignment.

Key Achievements

- Automated software deployment and maintenance procedures for customer environments.
 - Improved operational visibility through centralized monitoring and reporting.
 - Supported infrastructure operations for enterprise-level hospitality clients.
-

Business Development Manager | Be Souye Samyar Safar | December 2020 – March 2024

- Led business operations and expansion initiatives for a B2B hotel booking platform.
- Managed supplier integrations, API partnerships, and operational processes.
- Designed data-driven pricing and inventory management strategies.
- Coordinated business planning, budgeting, and executive reporting activities.

Key Achievements

- Expanded supplier ecosystem through multiple successful integrations.
- Reduced booking conflicts through improved inventory aggregation processes.
- Established reporting frameworks for shareholders and executive stakeholders.

Product Manager | Alibaba Travels Co. | April 2016 – October 2018

- Managed financial and operational technology initiatives supporting online travel services.
- Led CRM implementation and customer support optimization projects.
- Coordinated infrastructure-related projects including network planning, business continuity initiatives, and office expansion programs.
- Participated in business intelligence initiatives to improve operational reporting and decision-making.

Key Achievements

- Improved customer service operations through CRM optimization.
 - Supported large-scale infrastructure and operational transition projects.
 - Contributed to business intelligence and operational reporting initiatives.
-

Technology & Finance | (3Click.com & Kavir Motor) | July 2020 – November 2020

- Conducted infrastructure assessments, security reviews, and operational improvement projects.
 - Supported financial system integrations and online payment process optimization.
 - Provided technology recommendations for business process improvements.
-

Project Manager | Livefm Broadcasting | June 2012 – March 2016

- Managed the development and operation of cloud-based digital broadcasting services.
- Coordinated infrastructure planning for high-traffic live streaming events.
- Led project execution across technical and operational teams.

Key Achievements

- Successfully delivered large-scale online broadcasting projects.
 - Maintained service availability during peak traffic events.
-

Selected Technologies

Linux • Mikrotik • Docker • MySQL/ MariaDB • Postgres • Apache Superset • Git •
GitHub/Gitlab • CI/CD • Bash • Node.js • REST API • Virtualization • Monitoring • CRM • CMS

Education

- Associate Degree in Software Engineering (Islamic Azad University)
 - Professional Diploma in Reservation & Customer Service (IranAir Training Center)
-

Languages

- Persian (Native), English (Professional Working Proficiency)
